

## EU-Turkey relations in energy – more than words?

Workshop in the framework of the conference “Blickwechsel” (changing perspectives) by Stiftung Mercator at Humboldt University, Berlin, Hauptgebäude, Raum 2249a

Friday, 2 December 2016, 9:30 - 11:00

<b>Presentation of project results</b>	Simon Schulte (Universität zu Köln /ewi ER&S), Prof. Dr. Atila Eralp and Nilgün Öner (Middle East Technical University, Ankara), Mirja Schröder (Universität zu Köln)
<b>Moderation</b>	Prof. Dr. Wolfgang Wessels (Universität zu Köln)
<b>Discussants</b>	Prof. Dr. Marc Oliver Bettzüge (Universität zu Köln/ewi ER&S), Prof. Dr. Volkan Ediger (Kadir Has University, Istanbul), Dr. Volkan Özdemir (EPPEN, Ankara), Dr. Karl-Peter Thelen (ENGIE Deutschland AG), Helge Tolksdorf (Bundesministerium für Wirtschaft und Energie)

Speaking of Turkey’s potential of becoming an energy hub, there is a striking gap between the political discourse of Turkey’s role in EU energy supply, and the economic analyses of its prospects to become a hub or transit country. What are the reasons for this divergency – and what are the implications for policy, industry and academia?

The workshop is based on the results of the research project “Turkey’s Potential as Future Energy Hub – Economic Developments and Political Options”, which was conducted by ewi Energy Research & Scenarios gGmbH (ewi ER&S), the Centre of Turkey and European Union Studies (CETEUS) at the University of Cologne and the Middle East Technical University (METU) Ankara from 2014 to 2016.

Participants are invited to further discuss the results over coffee. Please register to Ms Pelin Gölge: [pegin.goelge@uni-koeln.de](mailto:pegin.goelge@uni-koeln.de).
